

I am a subscriber to XM Satellite radio. I feel it is unjust that the NAB is trying to petition to prevent XM from offering everything it does, including traffic and weather. It is my right as a citizen to choose to subscribe to XM, and have everything available via XM instead of AM/FM. Our economy is based on a free market, one that thrives on competition. This petition is designed to stop this free competition. Instead of increasing thier services, the NAB wants the federal government to stop the competition. As a consumer, I want ALL free choices available to me. Please do not support this NAB petition 04-160!
